NOREX Alliance Adopts Global Industry Classification Standard (GICS)

The goal of NOREX is to offer investors, issuers and exchange members a cost-effective Nordic securities market of a high quality. The NOREX Alliance is unique as it is the first exchange alliance with a joint trading system already in operation with harmonized trading rules and membership criteria for the participating countries. The alliance today consists of Copenhagen Stock Exchange, Iceland Stock Exchange, Oslo Børs, Stockholm Stock Exchange and Helsinki Stock Exchange.

Introduction

1.1 Background

This booklet describes how the Copenhagen Stock Exchange, Iceland Stock Exchange, Oslo Børs, Stockholm Stock Exchange and Helsinki Stock Exchange (the NOREX Exchanges) calculate All-Share, Sector and Benchmark indices. It is aimed at users, investors and others interested in the construction and computation of such indices[1].

All the NOREX Exchanges also calculate tradable indices: KFX in Copenhagen, ICEX-15 Cap in Reykjavik, OBX in Oslo, OMXS30 in Stockholm and OMXH25 in Helsinki. The description of the calculation of these indices is not included in this booklet.

Calculation of the All-Share, Sector and Benchmark indices and the adjustments of them are broadly similar for all NOREX Exchanges and are described below. Where differences do occur between the NOREX Exchanges, these are described.

1.2 The Index Family

The index family can basically be divided into two groups.

The first group is focused on investability of the constituent companies and periodic stability of the index composition, while still reflecting the population of stocks from where the index was constructed. The objective of the indices in this group is to reduce administrative routines and costs due to continuous re-balancing of a portfolio and secure tradability of the Index Constituents in order for the index to function as an investible benchmark for the investment community. In the first group we find the **Benchmark Index**.

The focal point of the second group is to mimic the population of stocks representing the index, without complying with liquidity and stability requirements as in the first group. Since there is no filtering for liquidity the indices themselves may not be easy to replicate in a portfolio or benchmark against and the pricing of the constituents, and hence the index level, may lag due to infrequent trading in the underlying shares. However, the objective of the indices in the second group is to more closely represent the overall state and changes in the level of the economy. The second group includes the **All-Share index and the Sector indices**.

1.3 The NOREX Exchanges and the Index Committee

The NOREX Exchanges are the sole and exclusive owners of all rights, titles and interest in and to the indices[2]. Any products based on the indices require permission by the relevant NOREX Exchange.

The NOREX Exchanges carry out the periodically and daily maintenance of the indices, such as calculating and distributing the index levels and calculation parameters, in accordance with "The Rules for the Construction and Maintenance of the NOREX Exchanges' All-Share, Sector and Benchmark Indices".

The NOREX Exchanges have set up a NOREX Index Committee with quarterly meetings. The role of the NOREX Index Committee is to determine and review "The Rules for the Construction and Maintenance of the NOREX Exchanges All-Share, Sector and Benchmark Indices" and to consider and agree on additions and deletions in accordance with these rules, especially for the semi-annual review of the "Benchmark Index" composition.

[1] Iceland Stock Exchange will not yet calculate a Benchmark index.

[2] The use of the indices is the sole responsibility of the user. The NOREX Exchanges shall not be liable for any loss or damage whatsoever or howsoever caused or arising in connection with the use of the indices.

1.4 Information Policy

Changes to the index composition and "The Rules for the Construction and Maintenance of the NOREX Exchanges' All-Share, Sector and Benchmark Indices" will be published by the NOREX Exchanges. Detailed information on special events, such as the semi-annual review of the Benchmark Index composition and adjustments caused by corporate actions, will be published via the "Index Notice" in Oslo, the Exchange Notice in Stockholm and Helsinki, via ICEX´s news webpage in Iceland and to subscribers via the StockWise system in Copenhagen.

The Index Notice, the StockWise system and the Exchange Notice are daily services, which, among other types of information, distribute index information. Distribution is electronically by means of e.g. e-mail or FTP.

Deadlines for announcements:

- **Rule amendments**: Material changes to the rules are normally announced 3 months before they are put into effect.
- **Periodic index composition**: A preliminary notice is normally announced no less than 20 calendar days and a definitive notice is normally announced no less than 2 calendar days prior to implementation. The Exchanges reserves the right to publish more than one preliminary composition in case of a merger or take-over.
- **Daily maintenance**: Adjustments of the "Benchmark index" due to corporate actions and dividends are announced immediately after the Exchanges have received all information needed to accomplish the adjustments and no later than the day prior to the event taking effect. Adjustments of other indices are announced no later than the day prior to the event taking effect.

2 Sector and Industry Classification

2.1 The NOREX Exchanges and Morgan Stanley Capital International Inc. (MSCI)

The NOREX Exchanges have entered into a licence agreement with Morgan Stanley Capital International Inc. (MSCI) with respect to classification of shares listed on the NOREX Exchanges under the Global Industry Classification Standard (GICS).[3]

The NOREX Exchanges have adopted the GICS as the official and primary method for classification of all share classes listed on the NOREX Exchanges.

2.2 The Classification

The GICS aims at easing the investment research and asset management process for financial professional's worldwide. It is the result of numerous discussions with asset holders, asset managers, and investment analysts around the world and is designed to respond to the global financial community's need for an accurate, complete and standard industry definition.

The GICS consists at the moment of 10 sectors, 24 industry groups, 64 industries and 139 sub-industries[4]. MSCI will classify all equities on Sub-Industry level. The NOREX Exchanges may decide to calculate indices on various levels, but the NOREX Exchanges will as a minimum and for the purpose of direct comparison compute indices at the Sector level and the Industry Group level.

The key features of the GICS are:

- **Universal**: The classification applies to companies globally
- **Accurate**: The structure accurately reflects the state of the industries in the equity investment universe
- **Flexible**: Four levels of analysis, ranging from the most general sector to the most specialised sub-industry
- **Evolutionary**: Annual reviews will be conducted to ensure that the classification remains fully representative of the universe

2.3 Company Classification Guidelines

The GICS assigns each company into a sub-industry according to the definition of its principal business activity. Since the classification is strictly hierarchical at each of the four levels, a company can only belong to one grouping.

The classification aims at providing an accurate, complete and long-term view of the global investment universe from an industrial perspective. For most companies, revenues reflect more precisely companies' activities than earnings, as they are less volatile than earnings. Furthermore, industrial and geographical breakdowns of revenues are available for most companies while many companies still do not provide earnings' breakdowns. Nevertheless, company valuations are more closely related to earnings than revenues and therefore remain an important consideration. Consequently, companies are classified primarily on the basis of revenues, while earnings are considered as a second criterion.

[3] The Global Industry Classification Standard (GICS) was developed by and is the property of and a service mark of Morgan Stanley Capital International Inc (MSCI) and Standard and Poor's (S&P). The standard comprises the naming, methodology, structure, coding convention and other elements for classifying securities. MSCI is the sole and exclusive owner of all rights, titles and interest in and to the GICS. Copenhagen Stock Exchange, Stockholm Stock Exchange, Helsinki Stock Exchange, Iceland Stock Exchange and Oslo Børs are entitled to distribute and permit third parties to redistribute and use the classifications made by MSCI and S&P using the Global Industry Classification Standard (GICS).

[4] The updated GICS classification is valid as from the close of April 29, 2005.

The primary source of information used to classify shares is the companies' annual reports and accounts. Other sources include brokers' reports and other published research literature. As a general rule, a company is classified into the sub-industry whose definition most closely describes the business activities that generate the majority of the company's revenues. However, a company engaged in two or more substantially different business activities, none of which contributes 60% or more of revenues, is classified in the sub-industry which provides the majority of both the company's revenues and earnings. When no sub-industry provides the majority of both the company's revenues and earnings, classification will be determined based on Morgan Stanley's analysis.

In addition, a company significantly diversified across three or more sectors, none of which contributes the majority of revenues or earnings, is classified either in the Industrial Conglomerates sub-industry (Industrial Sector) or the Multi-Sector Holdings sub-industry (Financial Sector).

In the case of a new issue, the classification will be determined primarily on the basis of the description of the company's activities and pro forma results as given in the prospectus.

A Company's industry classification will be reviewed either when a significant corporate restructuring occurs or when the new annual report is made available. In any case, in order to provide a stable industry classification, when reviewing a company's classifications, Morgan Stanley will attempt to minimise changes in the industry classification by disregarding temporary fluctuations in the results of a company's different business activities.

In the event that the above guidelines should not appropriately capture a particular company's business activity, its classification will be determined on the basis of a more extensive analysis.

MSCI, together with S&P, shall have sole decision making responsibility with respect to classifications under the Global Industry Classification Standard (GICS).

2.4 Structure of the Global Industry Classification Standard

The classification is structured into four levels, where the 10 sectors at the first level are represented here. For a full breakdown on all levels, see Appendix 1 - Structure of the Global Industry Classification Standard.

10 Energy
15 Materials
20 Industrials
25 Consumer Discretionary
30 Consumer Staples
35 Health Care
40 Financials
45 Information Technology
50 Telecommunication Services
55 Utilities

3 Construction and Maintenance

3.1 Eligible securities

In principle, all stocks listed on the NOREX Exchanges are eligible for inclusion. However, certain criteria such as liquidity may make a stock ineligible for index purposes.

StockholmStock Exchange defines the number of shares in the index by the domicile. Oslo Børs, Copenhagen Stock Exchange and Helsinki Stock Exchange distinguish between primary or secondary listing. A Company whose shares have a secondary listing on the Exchanges or a foreign domicile is also eligible for index inclusion. For secondary listings and foreign domicile, only the part of the outstanding shares which is registered in the NOREX CSDs (VPS, VPC, VP and APK) is eligible for inclusion.

The Danish legislation does not make it mandatory for equities to be registered with the Danish Securities Center (VP). For secondary listings not registered with the VP, the Copenhagen Stock Exchange uses a model primarily based on the relative turnover in number of shares on the Exchange compared with the company's total turnover in number of shares on the principal place of listing.

If a company has listed multiple stock classes, each of which is priced and traded separately, all stock classes are eligible for inclusion and are treated as separate securities.

Rights, warrants or similar derived securities are not eligible for index inclusion.

3.2 Benchmark Index

3.2.1 Periodic review of the index

The Benchmark Index shall be an investible index representing all shares listed on the respective NOREX Exchange. In order to fulfil conditions set forth in the object of the index, the "Benchmark Index" is reviewed semi-annually by the NOREX Exchanges who apply the four criteria in 3.2.2-3.2.4. In the period between reviews the number of shares for each security applied in the index calculation is fixed with the exception of adjustments for corporate actions with priority for existing shareholders. The NOREX Exchanges will provide both an uncapped and a capped version of the Benchmark Index, the market capitalisation limit is described in 3.2.4.

The review is conducted on the basis of figures as of November 30 and May 31. Implementation of the reviewed index will be effective from January 1 and July 1, respectively. Re-balancing will be undertaken using closing prices the day prior to implementation.

3.2.2 Liquidity and industry target criteria

The following five-step process is applied selecting the securities that constitute the index:

(i) To avoid seasonal fluctuations all eligible securities listed on the relevant NOREX Exchange are sorted according to the previous 12 months official turnover.
(ii) Securities with lowest turnover according to (i) corresponding to 30% in number are deemed ineligible.
(iii) Securities with highest turnover according to (i) corresponding to 10% but minimum 25 securities are tagged qualified.
(iv) All securities according to (i) are sorted according to Industry Group (GICS level 2). Within each Industry Group, securities are sorted according to the free float-adjusted market cap.
(v) Within each Industry Group, securities are elected according to ordering in (iv), highest free float-adjusted market cap first, until at least 85% of the industry-group's free float-adjusted market cap is reached. If needed additional securities with highest turnover according to (iii) are added. The Securities with lowest

turnover according to (ii) are removed. The target of at least 85% of each industry-group's free float-adjusted market cap may not be reached since some securities according to (ii) are not eligible.

If a significant portion of the trading volume of a stock which qualifies as an Index Constituent is attributable to a few transactions or to transactions within a limited time period so that the registered volume is considered not to be representative, the NOREX Exchanges may decide that the stock is ineligible.

If a company gains control of 90 per cent of the outstanding shares in another company, according to 5.8, in the period between November 30 / May 31 and time for publishing the preliminary composition, the acquired company will not be included in the selection process. During a merger or take-over when the outcome is uncertain the Exchanges reserve the right to publish more than one preliminary composition.

If a company changes from secondary to primary listing or changes domicile, the company will inherit historical turnover figures.

3.2.3 Free float criteria

Free float is an important issue when constructing an investible index. Free float is defined as the portion of the share capital of a company, which is freely available for trading in the market. The objective of introducing free float criteria is to avoid a distortion in the price of a security and to improve the index' overall investability.

Portfolio investments such as pension funds, unit trusts (mutual funds) and shares held by insurance companies are generally not considered to restrict the free float. A low free float will not exclude a company from an index but will restrict the percentage portion of the outstanding shares, which is included in the Benchmark Index calculation. The free float criterion may be applied for secondary listings and foreign domicile if the number of shares in the index calculation is based on at least a majority of the total capital in the stock class.

Free float is measured by identifying the ownership of the ten largest investors. The review is conducted on the basis of figures from the first two weeks in November and May. Only publicly available information is used in calculating the free float restriction.

The following ownership is in general considered as restricting free float:

- Government holdings - Shareholdings owned by governments. This does not include shareholdings owned by a municipality.
- Controlling shareholders – Shares owned by a private or a public shareholder representing at least 50% of the capital are always considered as non-free float. Ownership Stakes exceeding 30% are also considered as non-free float. If one ownership stake exceeding 10% combined with another ownership stake exceeds 40%, they are considered as non-free float. If three or more ownership stakes, all exceeding 10%, combined exceeds 50%, they are considered as non-free float. Shareholdings owned by a company in the same Industry Group exceeding 10% of the capital are always considered as non-free float.
- Company Insider stakes – Shares owned by persons included in the Insider list from the Financial Supervisory Authority. Including treasury shares owned by the company itself. Shares owned by companies with representatives on the board are considered as insider stakes.
- Cross holdings – Shares owned by an index constituent or a non-constituent. Note: The holdings are only classified as non-free float if both companies own shares in each other.

Securities with a free float greater than 15% will be included in the index with an inclusion factor equal to their actual free float (one decimal), rounded up to the closest 5%. Securities with a free float less then 15% will be included in the index with an inclusion factor equal to their actual free float, rounded down to the closest 1%. The constituent's free float is generally not changed between the review dates.

Because of limited access to ownership stakes in the Danish legislation, the Danish benchmark indices can only be restricted due to information from section 28 and 29 (Securities Trading, etc. Act), which contains information for each 2 and 5 per cent jump in ownership.

Because of limited access to ownership stakes in the Finnish legislation, the Finnish benchmark indices can only be restricted due to information from the chapter 2 section 8 to 10 in The Securities Markets Act, which contains information of every 5 per cent jump in ownership up to 25 per cent and there after at one-third, a half and two-thirds.

3.2.4 Market capitalisation limit (Capping)

The NOREX Exchanges will provide uncapped and capped versions of selected indices (e.g. Benchmark Indices).

If a constituent dominates the index due to a large weight in the index, two problems arise. The constituent or its industry may be over-represented in the index and skew the index performance compared to the investment universe of all stocks listed on the NOREX Exchanges. The index is no longer investible for a majority of the users who benchmark against the index due to possible investment restrictions.

Consequently, to comply with demands of an investible index, the capped version of the selected indices is constructed in a manner that complies with the investment restrictions implied by legislation regulating investments in mutual funds.

The following index weight restrictions must be met to comply with the legislation regulating investments in mutual funds:

- The market value of securities issued by the same body may not exceed 10 per cent of the index total market value.
- The market value of securities issued by the same body exceeding 5 per cent index weight must not combined exceed 40 per cent of the index' total market value.

The procedure maintaining these restrictions is applied subsequently to application of criteria 3.2.3.

Oslo Børs,Stockholm Stock Exchange and Helsinki Stock Exchange are maintaining the weighting restrictions by using a quarterly and daily procedure. Copenhagen Stock Exchange is maintaining the weighting restrictions by using a monthly and a weekly procedure.The weighting restrictions will be imposed by adjusting the number of shares of the constituents $q_{i,t}$.

Quarterly adjustment:
Selection of constituents to the 40 per cent group on **quarterly** basis:
Securities are ranked by their company market value. Securities issued by the same body exceeding the 10 per cent limit will be capped at 9 per cent. Securities are separated into two groups. The first group is filled with securities issued by the same body weighting between 4.5 and 9 per cent until the total weight has reached the maximum of 36 per cent.

The initial capping limit for the second group will be 4.5 per cent. This means that limits are used initially for all constituents in the index when the weights are set on quarterly basis. The limits imposed by legislative authorities (5, 10 and 40 per cent) will in the daily/weekly capping process be used as threshold values for the capped companies.

The process of the quarterly division of groups will be applied intra **quarterly** in the event of a Fast Entry.

If no capping is necessary, no groups are formed in the beginning of the quarter. Securities issued by the same body that exceeds 10 per cent are capped down to 9 per cent. Groups will be formed intra quarter if the securities issued by the same body above 5 per cent exceed the 40 per cent limit.

Daily adjustment:

Oslo Børs, Stockholm Stock Exchange and Helsinki Stock Exchange
"As needed" rebalancing is done at the close of each day. Securities issued by the same body exceeding the 10 per cent limit will be capped at 9 per cent. Securities issued by the same body initially capped at 4.5 and 9 per cent will be allowed to float freely up to 10 per cent. If the total weight of the securities issued by the same body above 5 per cent exceeds 40 per cent, the securities issued by the same body above 5 per cent with the smallest weight are capped to 4.5 per cent. Using a stepwise approach Index Constituents are reduced in weight until all weight restrictions are satisfied. This procedure is applied once a day, and as a consequence, the weight of the Index Constituents may exceed the 40 and 10 per cent limits during the day.

Weekly adjustment:

Copenhagen:
"As needed" rebalancing is done every Friday. Securities issued by the same body exceeding the 10 per cent limit will be capped at 9 per cent. Securities issued by the same body initially capped at 4.5 and 9 per cent will be allowed to float freely up to 10 per cent. If the total weight of the securities issued by the same body above 5 per cent exceeds 40 per cent, the securities issued by the same body above 5 per cent with the smallest weight are capped to 4.5 per cent. Using a stepwise approach Index Constituents are reduced in weight until all weight restrictions are satisfied. This procedure is applied once a week, and as a consequence, the weight of the Index Constituents may exceed the 40 and 10 per cent limits during the week.

3.3 All-Share and Sector Indices

3.3.1 General

The "All-Share and Sector Indices" are by construction not intended to be investible indices. The maintenance of the index compositions is carried out on a daily basis to reflect the continuous changes in outstanding shares and listed companies. New listings shall be included on the second day of listing providing that the company has been assigned a GICS classification.

3.3.2 All-Share Index

The "All-Share Index" consists of all shares listed on the respective NOREX Exchange[5].

3.3.3 Sector Indices

Each of the Sector indices, Industry Group indices and Industry indices consists of all shares listed on the relevant NOREX Exchange in its respective Sector, Industry Group and Industry (GICS level 1, 2 and 3).

[5] On the Helsinki Stock Exchange and Iceland Stock Exchange the All-Share index includes all shares listed on the Main List.

4 Index Calculation

4.1 General

NOREX Exchanges calculate index-values in real-time.

4.2 Formula

The main objective of the index calculation is to exceedingly reflect the changes in value of a portfolio consisting of the Index Constituents.

Oslo Børs, Iceland Stock Exchange, Copenhagen Stock Exchange and Helsinki Stock Exchange are calculating the indices using the following formula:

$$I_t = \frac{\sum_{i=1}^{n} q_{i,t} * p_{i,t} * r_{i,t}}{\sum_{i=1}^{n} q_{i,t} * \left(p_{i,t-1} - d_{i,t}\right) * r_{i,t-1} * j_{i,t}} * I_{t-1},$$

where

I_t = Index level at time t
$q_{i,t}$ = Number of shares of company i applied in the index at time t
$p_{i,t}$ = Price in quote currency of a share in company i at time t
$d_{i,t}$ = Dividend only used for total return indices
$r_{i,t}$ = Foreign exchange rate of index quote currency to quote currency of company i at time t
$j_{i,t}$ = Adjustment factor for adjusting the share price of a constituent security due to corporate actions by the issuing company at time t

Stockholm Stock Exchange is calculating the indices using the following formula:

$$I_t = \frac{\sum_{i=1}^{n} q_{i,t} * p_{i,t} * r_{i,t}}{\sum_{i=1}^{n} q_{i,t-1} * \left(p_{i,t-1} - d_{i,t}\right) * r_{i,t-1} + j_{i,t}} * I_{t-1},$$

where

I_t = Index level at time t
$q_{i,t}$ = Number of shares of company i applied in the index at time t
$p_{i,t}$ = Price in quote currency of a share in company i at time t
d = Dividend only used for total return indices
$r_{i,t}$ = Foreign exchange rate of index quote currency to quote currency of company i at time t
$j_{i,t}$ = Adjustment amount for the constituent security due to corporate actions by the issuing company at time t

The formula yields the end of period t index value represented by the sum of the previous index value and the periodic percentage change in the market capitalisation (adjusted for corporate actions) multiplied by the previous index value. I.e. $I_t = (1+R) * I_{t-1}$, where R represents the periodic percentage change in the value of the portfolio consisting of the Index Constituents.

4.3 Price Algorithm

To represent the price in the quote currency of a share, $p_{i,t}$ in the formula in 4.2, the NOREX Exchanges apply the following rule:

If an officially registered trading price for an index stock has not been quoted on the relevant trading day, the last quoted trading price shall be used in the calculation. If a bid has been quoted that is higher than the last quoted trading price, the bid shall be applied in the calculation. If an offer has been quoted that is lower than the last quoted trading price, the offer shall be applied in the calculation. If either the closing bid or offer is used as the closing value, this price will be viewed as the last traded price in the calculation of the index on the following day, until a new official trade price is registered.

In algorithmic form:

If there exists an official trade then
    if bid > trade then $p_{i,t}$ = bid
    if ask > 0 and ask < trade then $p_{i,t}$ = ask
    else $p_{i,t}$ = trade
else if bid > start then $p_{i,t}$ = bid
else if ask > 0 and ask < start then $p_{i,t}$ = ask
else $p_{i,t}$ = start

where
bid = best official buying order
ask = best official selling order
trade = last official trade in the security
start = the starting price of the security in the index

The calculation for the Stockholmsbörsen Benchmark and the Helsinki Stock Exchange Benchmark is based on the official last quoted trading price for the security or the price at the close of the Index on the previous day.

4.4 Number of Shares

4.4.1 Benchmark Index

The number of shares of a constituent applied in the index, $q_{i,t}$ in the formula in 4.2 is a result of the semi-annual review and is fixed in the period between reviews with the exception of adjustments for corporate actions with priority for existing shareholders. The NOREX Exchanges will provide both an uncapped and a capped version of the Benchmark Index, the market capitalisation limit is described in 3.2.4.

4.4.2 All-Share and Sector Indices

The number of shares of a company applied in the index, $q_{i,t}$ in the formula in 4.2, is the current outstanding number of shares. If corporate actions cause adjustments to the index, the number of shares is changed to fully reflect the new market capitalisation of the company in the index.

In connection with non-cash issues and similar issues, see rule 5.6, the Copenhagen Stock Exchange, Oslo Børs, Iceland Stock Exchange, Stockholm Stock Exchange and Helsinki Stock Exchange make the adjustment without delay.

For secondary listings, the number of shares for each security applied in the index calculation is changed by Stockholm Stock Exchange, Copenhagen Stock Exchange and Helsinki Stock Exchange on the first trading day of each month. The adjustment is based on the number of shares, which is registered in relevant NOREX CSDs (VPC, APK and VP) on the 20th the previous month. Oslo Børs changes the number of shares on the third Friday in March, June September and December. The adjustment is based on the number of shares, which is registered in relevant NOREX CSD (VPS) on the last trading day of the previous month.

4.5 Currency

The foreign exchange rate of index quote currency to quote currency of a company applied in the index, $r_{i,t}$ in the formula in 4.2 is the exchange rate used to convert the price of a share into the quote currency of the index.

All indices are calculated and quoted in a single currency. To calculate the index in any other currency than the quote currency, the index levels may be multiplied by the exchange rate of the new currency to the index quote currency.

The official exchange rate fixing, $r_{i,t}$, is calculated by the Exchanges every 15 seconds during official trading hours. To calculate the exchange rate fixing, the Exchanges apply the following algorithm on real-time spot rate quotes from the Reuters:

Reuters filters the market maker quotations according to the following criteria:
(i) Market Maker Population: Selection of valid quotation sources.
(ii) Tolerance-Check: Controls the maximum movement of the mid-price from a moving average based on the last three quotations
(iii) Spread-Check: Controls the spread of the quotation to ensure reasonable spreads

Three steps procedure to calculate the exchange rate fixing based on valid market maker quotations
(i) Mid-prices: Calculate the mid-price, i.e. average of bid-ask, for all valid market maker quotes, restricted to maximum one quotation per market maker
(ii) Median of the mid-prices: Calculate the median of the mid-prices
(iii) Rounding: The median of the mid-prices is rounded to 5 decimal places

If no foreign exchange rate fixing is available arising from technical failure or other causes not controlled by the Exchanges, the Exchanges may use other sources to calculate a new foreign exchange rate fixing. If the Exchanges consider the foreign exchange rate fixing not representative, the Exchanges may calculate a new foreign exchange rate fixing potentially using other sources.

4.6 Dividends

Oslo Børs, Copenhagen Stock Exchange and Helsinki Stock Exchange calculate both price (PI) and total return (GI) versions of all indices. Oslo Børs distributes the total return version (official indices) while Copenhagen Stock Exchange and Helsinki Stock Exchange distributes both versions. Stockholm Stock Exchange calculates price indices of all official indices and a total return version of the Benchmark Index. Iceland Stock Exchange calculates price indices of all official indices and calculates and distributes a total return version of the ICEX-15 Index and the All Share Index.

4.6.1 Gross indices (GI)

To reflect the true performance of an index, dividends are reinvested in the total return version of the index. The reinvestment is carried out by adjusting the $p_{i,t-1}$ in the denominator in the index with subtraction of dividends from this price on the ex-dividend date t. This adjustment reinvests the dividend in all index constiuents in proportion to their respective weights.

$$\tilde{p}_{i,t-1} = p_{i,t-1} - dividend$$

4.6.2 Price indices (PI)

In a price return index no cash dividend is reinvested in the index. Hence, the price return index only yields the performance of stock price movements. The difference in rate of return for the total and price return version of an index is attributable to the dividend yield of the index.

4.7 Adjustment Factor

If a company carries through with a corporate action with priority for existing shareholders, any diluting effects must be adjusted for in order to reflect the true performance of the security and index. In the event of a corporate action undertaken by a constituent company, the Exchanges will calculate the adjustment factor or adjustment amount applied in the index calculation, $j_{i,t}$ in the formula in 4.2, according to the rules in section 5.

The adjustment factor used by Oslo Børs, Iceland Stock Exchange, Copenhagen Stock Exchange and Helsinki Stock Exchange expresses the theoretical percentage change in the stock price as a result of the dilution.

The adjustment amount used by Stockholm Stock Exchange expresses the amount by which the value of the Index Constituent is adjusted following an increase in the share capital of the company in question, converted to the presentation currency of the Index:

$$\sum j_{(t-1<->t)} = \sum_{i=1}^{n} P_{i,t-1} * (q_{i,t} - q_{i,t-1}) * r_{i,t-1}$$

Adjustment amount for Index Constituent i (increase in number of shares multiplied by the subscription price or $P_{i,t-1}$).

4.8 Fixing Value

The Oslo Børs calculates fixing values for indices on a daily basis. The fixing value is calculated by using volume weighted average prices for each constituent instead of the ordinary price algorithm described in 4.3.

The Exchanges are using the following formula to calculate fixing values:

$$\bar{I}_t = \frac{\sum_{i=1}^{n} q_{i,t} * \bar{p}_{i,t}}{\sum_{i=1}^{n} q_{i,t-1} * p_{i,t-1} * r_{i,t-1} * j_{i,t}} * I_{t-1},$$

where

$$\bar{p}_{i,t} = \frac{\sum_{j=1}^{m} n_{j,t} * p_{j,t} * r_{j,t}}{n_{m,t}}$$

The variable $n_{j,t}$ is the number of shares in trade j on day t and $n_{m,t}$ is the total number of shares traded on day t. The other variables are as in formula in 4.2. When calculating the average price for the Index Constituent, only transactions which have been carried out during opening hours at a price which is within the range of the highest bid price and the lowest ask price for such stock at the time of the transaction shall be taken into account. For securities quoted in other currencies than the index quote currency, the $r_{j,t}$ is the exchange rate fixing nearest in time prior to the corresponding trade. By matching the exchange rate fixing and trade in time, the volume weighted average price is expressed in the quote currency of the index.

4.9 Suspension and Trading Halt

In case of a suspension or trading halt of an Index Constituent, please refer to the trading rules of the relevant NOREX Exchange.

5 Corporate Actions

This section lists the most common corporate actions undertaken by listed companies and describes the appropriate adjustment applied by the NOREX Exchanges to uphold the correct representation of the indices performance. Re-balancing will be undertaken using closing prices the day prior to implementation.

The following corporate actions may lead to an adjustment of the indices.

- Issues
- Split / Reverse split and change in face value
- Market price issue
- Spin-off and adjustments for issues
- Merger / take-over
- Redemption and cancellation of shares

The adjustments effected after the individual events are described in detail below.

5.1 Discretionary adjustments

The relevant Exchanges decide which adjustment alternative shall be employed. The Exchanges may in the cases described below make other adjustments than those stated, if warranted by special circumstances. The NOREX Exchanges may also make adjustments to an index in other cases than stated below. Notwithstanding, the index adjustments shall wherever possible be in accordance with the aims set forth in 4.2.

5.2 Daily vs. periodic review of number of shares in the index

There is a fundamental difference in the treatment of adjusting number of shares in indices that only review number of shares periodically compared to that of indices reviewing number of shares on a daily basis.

Indices reviewing number of shares on a daily basis include all shares outstanding or thereof implied number of shares in the event of corporate actions.

For indices where the number of shares is reviewed periodically, the number of new shares is determined in accordance with the terms of the corporate action.

5.3 New Share Issue with rights for existing shareholders (Rights Issue)

New share issue is an offer by the company to existing shareholders to take part in a new issue of shares. The new shares are offered in proportion to each shareholder's existing holding, generally at a reduced price. The issue of shares at below-market-price results in dilution of the head shares. In a rights issue both the number of shares outstanding and market capitalisation of the company increases.

Effective from the ex-date, the number of shares and price of the constituent is adjusted to reflect its true performance.

It is assumed that the rights offerings is fully subscribed. For indices reviewing number of shares on a daily basis and in the case of a not fully subscribed offering, the number of shares included in the index will be adjusted to reflect the actual number of shares subscribed. For indices where the numbers of shares are reviewed periodically and in the case of a not fully subscribed offering, the number of shares included in the index may be adjusted to reflect the actual number of shares subscribed. If the new shares deviate significantly from the Index Constituent, the Method described in 5.7.1 shall be applied.

Oslo Børs, Iceland Stock Exchange, Copenhagen Stock Exchange and Helsinki Stock Exchange are calculating the adjustment factor using the following formula:

$$\text{Adjustment factor j} = \left(\frac{p_{ex}}{P_{cum}} \right)$$

$$p_{ex} = \left(\frac{p_{cum} \cdot m + P \cdot n}{m + n} \right)$$

p_{cum} = Security price cum-rights
p_{ex} = Theoretical security price ex-rights
P = Subscription price
m = Number of head shares
n = Number of new shares

Stockholm Stock Exchange is calculating the adjustment amount by using the following principles:

The number of Index shares shall be increased from the day when the stock is listed on the Exchange without rights to participate in the issue (the ex-day). The adjustment amount $(j_{i,t})$ is the new number of shares multiplied by the subscription price in the prospectus, see section 4.7 above. Adjustments will not take place until there is a new price observation for the permanent security.

$j_i = p_i * (q_{i,t} - q_{i,t-1})$

As legislation in Denmark allows for issues with deviating dividends, the following only applies to issues on the Copenhagen Stock Exchange. For this type of issues, theoretical prices for the use in the index are calculated for the new temporary security taking into account the actual difference in dividend payments on 'old' and 'new' shares. The calculation is made on the basis of the price for the permanent security (after the issue) after deduction of the dividend difference. Calculations of the theoretical prices are based on the most recent dividend paid.

$p_{i,new} = p_{i,old} - (dividend_{old} - dividend_{new})$

Temporary securities with different dividends are included separately in the index calculation because, by definition, the price for the security will differ from the price for the permanent security.

When the temporary security is later merged into the permanent security, an adjustment is made the day after the general meeting, which ensures that the transfer to the permanent security does not affect the index value.

5.4 Bonus issue

A bonus issue or stock dividend is an issue of shares free of charge to existing shareholders, the shares being brought into existence by the capitalisation of the company's reserves. The new shares are issued in proportion to each shareholder's existing holding. The issue of bonus shares is merely an accounting transaction and results in no flow of capital into or out of the company. The number of shares increases but the market capitalisation of the company remains unchanged. If the new shares deviate significantly from the Index Constituent, the Method described in 5.7.1 shall be applied.

The NOREX Exchanges will increase the number of shares of the constituent security, by the number of additional shares, on the day that the Index Constituent is first available for trading on the Exchange ex rights (ex-day).

5.5 Split / Reverse split and change in face value

A stock split or reverse split is the action of a company in splitting or recouping its shares, reducing or increasing, respectively, par value in proportion and so increases or decreases, respectively, the number of shares. The economic effect of a stock split or reverse stock split is equivalent to bonus issue, as there is no flow of capital into or out of the company. The number of shares increases but the market capitalisation of the company remains unchanged. If the new shares deviate significantly from the Index Constituent, the Method described in 5.7.1 shall be applied.

A reduction of share capital removes part of the nominal share capital of a security without affecting the market value. If the reduction takes place by maintaining the number of shares but reducing the face value of the shares (change in denomination) the price will not be affected and only the face value will be changed.

The NOREX Exchanges will increase the number of shares of the constituent security, by the number of additional shares, on the day that the Index Constituent is first available for trading on the Exchange ex rights (ex-day).

5.6 Market price issue

Market price issues where existing shareholders have waived their pre-emptive right to subscribe in the issue are usually offered to the public, directly to a person or an organisation. As the issue is not reserved for present shareholders it is assumed that they are somehow compensated for, if any, dilution. The issue of new shares results in flow of capital into the company, the number of shares increases and the market capitalisation of the company changes. Other issues like private placements and employee share issues, assimilation and division of shares, conversion of convertible debts and exercise of warrants or similar securities are also treated as a market price issue.

Effective on the ex-date, the number of shares of the constituent security is adjusted in indices that review the number of shares on a daily basis in order to reflect the new market capitalisation of the company. For indices reviewing the number of shares on a periodically basis, new shares from the issue are not included before implementation of the new index composition at the next periodic review. If the new shares deviate significantly from the Index Constituent, the Method described in 5.7.1 shall be applied.

Stockholm Stock Exchange is calculating the Adjustment amount in the indices that review the number of shares on a daily basis using the following principles:

The number of Index shares shall be increased when the stock is registered in relevant NOREX CSD (VPC). The Adjustment amount ($j_{i,t}$) is the new number of shares multiplied by the $P_{i,t-1}$, see section 4.7 above.

As legislation in Denmark allows for issues with deviating dividends the following only applies to issues on the Copenhagen Stock Exchange. For this type of issues, theoretical prices for the use in the index are calculated for the new temporary security taking into account the actual difference in dividend payments on 'old' and 'new' shares. The calculation is made on the basis of the price for the permanent security (after the issue) after deduction of the dividend difference. Calculations of the theoretical prices are based on the most recent dividend paid.

Temporary securities with deviating dividends are included separately in the index calculation because, by definition, the price for the security will differ from the price for the permanent security.

When the temporary security is later merged into the permanent security, an adjustment is made the day after the general meeting, which ensures that the transfer to the permanent security does not affect the index value.

5.7 Spin-off and adjustments for issues

A spin-off is the action of a parent company in distributing out among its shareholders the controlling stock that it holds in a subsidiary company or issuing of shares in a new company based on a part of its current business. The spin-off results in outflow of capital in form of capital transfer from the parent company to the new company. In a spin-off the number of shares outstanding remains unchanged. However, the price of the company will be affected.

5.7.1 Direct inclusion, Valuation method and exclusion from the Index

When the company, the shares of which constitute an Index Constituent, carries out any of the following measures and where the shareholders have preferential rights of participation either the Direct Inclusion, Valuation Method or exclusion from the index shall be used:

(i) issue of convertible bonds (debentures), debenture certificates carrying subscription warrants or similar securities,
(ii) offer to acquire securities or rights of any type or receive such securities or rights without consideration and
(iii) when a new issue is carried out which involves the issue of a new type of stock having rights that deviate significantly from the rights carried by the Index Constituent.

Direct Inclusion (Periodically rewieved indices)

If the issued security is a controlling stock that the company holds in a subsidiary company or a stock based on part of its current business and the stock is listed on the ex-day on the exchange and the new stock by a high degree of probability is expected to be liquid so prices will be obtained on the ex-day, the security will be included in the index on the ex-day with starting price 0. The rights connected to the issued security must be in conjuction with rule 3.1 Eligible Securities.

Valuation Method

Where valuation of the right can be effected, the opening exchange Price of the Index Constituent $P_{i,t-1}$ on the ex-day shall be determined at the most recent price on the preceding Bank Day less the calculated value of the right. Thereafter the regular index calculation shall take place employing the most recent transaction prices.

The Valuation Method may be used where the rights or when-issued futures are listed on the Exchanges or another exchange or market place approved by the Exchanges. The Exchanges have also the possibility of using an OTC stock price. These prices will only be used if they are representative taking into consideration the volume of trading in the rights or when-issued futures. In such cases the valuation shall be based on the last paid price of the rights or the when-issued futures on the day prior to the ex-day.

The calculated value of the right can also be based on the median value of valuations from members of the Exchanges, however, on the condition that the Exchanges, not later than the Bank Day prior to the ex-day, receive no less than five valuations.

If Stockholm Stock Exchange, Helsinki Stock Exchange or Oslo Børs obtain a satisfactory estimate of the right, the Valuation Method shall primarily be used and if no satisfactory estimate can be obtained the constituent security will be excluded from the index on the ex-day.

The Copenhagen Stock Exchange will not be using the valuation method, but will instead exclude the constituent security from the index.

Exclusion from the index

If no satisfactory estimate of the right has been obtained, effective on the ex-date only, the constituent security is excluded from the index. However, if no price has been obtained on the ex-day, the constituent security will remain excluded from the index until the day after the first price observation. The adjustment results in the excluded constituent having the same performance as the weighted average performance of the other Index Constituents as a proxy for its true performance.

5.7.2 Inclusion of issued securities in Periodically reviewed Indices

If a constituent company distributes the controlling stock that it holds in a subsidiary company or issuing of shares in a new company based on part of its current business and the distributed securities are listed on the exchange at the spin-off date, but not later than three (t+3) days after the spin-off, the new company will be included, on the second

day of listing, in the periodically reviewed indices until the next rebalancing date. Which method to be applied in the treatment of the spin-off will be evaluated according to the rules in 5.7.1.

5.8 Merger / take-over

A merger or take-over is to combine the ownership of two companies into a new company or that one company obtains the ownership of the other.

The adjustments below will be effective on the day the acquiring company control at least 90% of the outstanding shares in the acquired company. The term "control" is here defined as when either, (a) the acquiring company notifies the Exchanges of their control or receiving accepts of at least 90 per cent, (b) the transaction is registered in the Exchanges trading system or (c) the shares are registered with the NOREX CSDs (VPS, VPC, APK and VP).

In case such a replacement shall take place, the number of shares to be included in the Benchmark Index Calculation is determined in accordance with the terms of the offer or merger. Any conditions in the offer are not considered if the acquiring company gains control.

(i) If the acquiring company and the acquired company are constituents and the acquisition is settled entirely or partly in eligible shares, the market capitalisation of the acquiring company is increased in accordance with the terms of the offer or merger. The acquired company is deleted from the index.

(ii) If the acquiring company is not a constituent and the acquisition is settled entirely or partly in eligible shares, a part of the market capitalisation of the acquiring company is included in the index in accordance with the terms of the offer or merger. In case the new Index Constituent is listed on the Exchange before the last listing day for the existing Index Constituent, the replacement shall take place with effect from the second listing day regarding the new Index Constituent on the Exchange. In cases where the constituent is de-listed from the Exchange before the first listing day for the new Index Constituent, the Index Constituent shall be deleted effective from the day following the last trading day of the Index Constituent. The new Index Constituent shall be included from the second listing day.

(iii) If the acquiring company is not listed on the Exchanges or otherwise deemed unsuitable for inclusion, the acquired company is deleted from the index without including a new constituent.

(iv) If the acquiring company is a constituent and the acquired company is not a constituent, the market capitalisation of the acquiring company is not increased until the next semi-annually review.

However, if a breach in the conditions of the offer results in reversing the adjustment, the reversing is treated as spin-off in subsection 5.6.

5.9 Redemption and cancellation of shares

Where a company whose shares constitute Index Constituents resolves upon the redemption and cancellation of shares, the number of shares shall be adjusted in indices reviewing number of shares on a daily basis when the cancellation has been registered with the NOREX CSDs, according to the rule 4.4.2. Adjustment shall take place through a reduction in the number of shares included in the Index Constituent.

In indices reviewing number of shares periodically the adjustment is only made if the Index Constituent resolves upon the redemption and cancellation of shares and if the shareholders have preferential rights to participation, the number of shares shall be adjusted normally on the bank day following the day on which the Exchange has received the conclusive announcement. Adjustment shall take place through a reduction in the number of shares included in the Index Constituent.

If the capital reduction is followed by a distribution of cash and/or rights, the corporate action is treated according to subsection 5.7.

For the Copenhagen Stock Exchange the reduction is subject to the approval of the Danish Commerce and Companies Agency, which means that it will take effect the day after the day the reduction takes place.

5.10 Repurchase of own shares

In the event a company whose shares constitute an Index Constituent repurchases its own shares, the Exchanges do not adjust the number of shares included in the indices.
In indices reviewing number of shares periodically however, company owned shares are adjusted in connection with the semi-annual review of the indices according to subsection 3.2.3.

In the event a company whose shares constitute an Index Constituent repurchases and cancels its own shares, the number of shares shall be adjusted in indices reviewing the number of shares on a daily basis when the cancellation has been registered with the NOREX CSDs, according to the rule 4.4.2. The adjustment shall take place through a reduction in the number of shares included in the Index Constituent.

In indices reviewing the number of shares periodically an adjustment is only made if the Index Constituent repurchases and cancels its own shares and if the shareholders have preferential rights to participation. The number of shares shall/will normally be adjusted on the bank day following the day on which the Exchange has received the conclusive announcement. The adjustment shall take place through a reduction in the number of shares included in the Index Constituent.

If the capital reduction is followed by a distribution of cash and/or rights, the corporate action is treated according to subsection 5.7.

5.11 Fast entry

A new stock class listed on the Exchanges is generally not included in the index composition immediately in indices where the number of securities is reviewed periodically. However if a newly listed stock class is considered by the relevant NOREX Exchange to result in a serious deterioration in the Benchmark Index' ability to mimic the population of stocks representing the index, or if it is significant probability for the company to constitute the Benchmark Index at next rebalancing date, fast entry may be considered. No other securities are excluded resulting from addition of a new security.

5.12 Fast exit

If a security is de-listed from the NOREX Exchanges, an eligible replacement constituent is generally not included in the index composition immediately. This principle of fast exit is used in indices where the number of securities is reviewed periodically. The exclusion of an Index Constituent will usually be carried out on its last trading day unless the security is deemed unsuitable for index purposes earlier.

Constituents will be removed at zero value, if considered to be in liquidation (and therefore of no value), or at the suspension price for all other circumstances. The NOREX Committee will at their next regular meeting consider deleted securities, whose quotations are subsequently restored, for re-inclusion. Any re-inclusion will be at the deleted price.

Should a deleted constituent that has been suspended at a price other than zero (which would normally be the suspension price) be subsequently delisted and deemed to be of zero value, this stock will be included for one day's calculation in the index from which it was removed to enable the fall in the stock's value to be reflected in the index value. In this situation, the stock will be re-included at the suspension price, and its price will be zero throughout that day's calculation, including the closing price.

Copenhagen Stock Exchange will not remove a constituent at zero value but will instead exclude the constituent security from the index by using last paid price. This is due to the fact that trade reporting is allowed when the constituent security is suspended and until removal.

6 Limits of liability

The NOREX Exchange(s) assume(s) no liability for loss or damages related to or arising out of the use of the indices. The Exchanges expressly disclaim all warranties of accuracy, completeness, merchantability or fitness for a particular purpose with respect to the indices. Neither the Exchange(s) nor any third party make any express or implied warranties or representations in respect of the indices, the results to be obtained by the use hereof or the value of the indices at any given time.

Appendix 1 – Structure of the Global Industry Classification Standard

Sector (10)	Industry Group (24)	Industry (62)	Sub-Industry (132)
10 Energy	1010 Energy	101010 Energy Equipment & Services	10101010 Oil & Gas Drilling Drilling contractors or owners of drilling rigs that contract their services for drilling wells
			10101020 Oil & Gas Equipment & Services Manufacturers of equipment, including drilling rigs and equipment, and providers of supplies and services to companies involved in the drilling, evaluation and completion of oil and gas wells.
		101020 Oil, Gas & Consumable Fuels	10102010 Integrated Oil & Gas Integrated oil companies engaged in the exploration & production of oil and gas, as well as at least one other significant activity in either refining, marketing and transportation, or chemicals.
			10102020 Oil & Gas Exploration & Production "Companies engaged in the exploration and production of oil and gas not classified elsewhere."
			10102030 Oil & Gas Refining & Marketing "Companies engaged in the refining and marketing of oil, gas and/or refined products not classified in the Integrated Oil & Gas or Independent Power Producers & Energy Traders Sub-Industries."
			10102040 Oil & Gas Storage & Transportation "Companies engaged in the storage and/or transportation of oil, gas and/or refined products. Includes diversified midstream natural gas companies facing competitive markets, oil and refined product pipelines, coal slurry pipelines and oil & gas shipping companies."
			10102050 Coal & Consumable Fuels "Companies primarily involved in the production and mining of coal, related products and other consumable fuels related to the generation of energy. Excludes companies primarily

			producing gases classified in the Industrial Gases Sub-Industry."
15 Materials	1510 Materials	151010 Chemicals	15101010 Commodity Chemicals "Companies that primarily produce industrial chemicals and basic chemicals. Including but not limited to plastics, synthetic fibers, films, commodity-based paints, explosives and petrochemicals. Excludes chemical companies classified in the Diversified Chemicals, Fertilizers & Agricultural Chemicals, Industrial Gases, or Speciality Chemicals sub-industries"
			15101020 Diversified Chemicals " Manufacturers of a diversified range of chemical products not classified in the Industrial Gases, Commodity Chemicals, Speciality Chemicals or Fertilizers & Agricultural Chemicals sub-industries."
			15101030 Fertilizers & Agricultural Chemicals "Producers of fertilizers, pesticides, potash or other agriculture-related chemicals not classified elsewhere."
			15101040 Industrial Gases "Manufacturers of industrial gases."
			15101050 Specialty Chemicals "Companies that primarily produce high value-added chemicals used in the manufacture of a wide variety of products, including but not limited to fine chemicals, additives, advanced polymers, adhesives, sealants and speciality paints, pigments and coatings."
		151020 Construction Materials	15102010 Construction Materials "Manufacturers of construction materials, including sand, clay, gypsum, lime, aggregates, cement, concrete and bricks. Other finished or semi-finished building materials are classified in the Building Products sub-industry."
		151030 Containers & Packaging	15103010 Metal & Glass Containers "Manufacturers of metal, glass or plastic containers. Includes corks and caps."
			15103020 Paper Packaging "Manufacturers of paper and cardboard containers and packaging."
		151040 Metals & Mining	15104010 Aluminum "Producers of aluminum and related products, including companies that

			mine or process bauxite and companies that recycle aluminum to produce finished or semi-finished products. Excludes companies that primarily produce aluminum building materials classified in the Building Products sub-industry."
			15104020 Diversified Metals & Mining "Companies engaged in diversified production or extraction of metals and minerals not classified elsewhere."
			15104030 Gold "Producers of gold and related products, including companies that mine or process gold and the South African finance houses which primarily invest in, but do not operate, gold mines."
			15104040 Precious Metals & Minerals "Companies mining precious metals and minerals not classified in the Gold sub-industry. Includes companies primarily mining platinum."
			15104050 Steel "Producers of iron and steel and related products."
		151050 Paper & Forest Products	15105010 Forest Products "Manufacturers of timber and related wood products. Includes lumber for the building industry."
			15105020 Paper Products "Manufacturers of all grades of paper. Excludes companies specializing in paper packaging classified in the Paper Packaging sub-industry."
20 Industrials	2010 Capital Goods	201010 Aerospace & Defense	20101010 Aerospace & Defense "Manufacturers of civil or military aerospace and defense equipment, parts or products. Includes defense electronics and space equipment."
		201020 Building Products	20102010 Building Products "Manufacturers of building components and home improvement products and equipment. Excludes lumber and plywood classified under Forest Products and cement and other materials classified in the Construction Materials sub-industry."
		201030 Construction & Engineering	20103010 Construction & Engineering "Companies engaged in primarily non-residential construction. Includes civil engineering companies and large-scale contractors. Excludes companies

			classified in the Homebuilding sub-industry."
		201040 Electrical Equipment	20104010 Electrical Components & Equipment "Companies that produce electric cables and wires, electrical components or equipment not classified in the Heavy Electrical Equipment sub-industry."
			20104020 Heavy Electrical Equipment "Manufacturers of power-generating equipment and other heavy electrical equipment, including power turbines, heavy electrical machinery intended for fixed-use and large electrical systems. Excludes cables and wires classified in the Electrical Components & Equipment sub-industry."
		201050 Industrial Conglomerates	20105010 Industrial Conglomerates Diversified industrial companies with business activities in three or more sectors, none of which contributes a majority of revenues. Stakes held are predominantly of a controlling nature and stake holders maintain an operational interest in the running subsidiaries.
		201060 Machinery	20106010 Construction & Farm Machinery & Heavy Trucks "Manufacturers of heavy duty trucks, rolling machinery, earth-moving and construction equipment, heavy farm machinery and manufacturers of related parts. Includes shipbuilding."
			20106020 Industrial Machinery "Manufacturers of industrial machinery and industrial components. Includes companies that manufacture presses, machine tools, compressors, pollution control equipment, elevators, escalators, insulators, pumps, roller bearings and other metal fabrications."
		201070 Trading Companies & Distributors	20107010 Trading Companies & Distributors "Trading companies and other distributors of industrial equipment and products."
	2020 Commercial Services & Supplies	202010 Commercial Services & Supplies	20201010 Commercial Printing "Companies providing commercial printing services. Includes printers primarily serving the media industry."
			20201030 Diversified Commercial & Professional Services

			"Companies primarily providing commercial, industrial and professional services to businesses and governments, not classified elsewhere. Includes commercial cleaning services, consulting services, correctional facilities, dining & catering services, document & communication services, equipment repair services, security & alarm services, storage & warehousing, and uniform services."
			20201040 Human Resource & Employment Services "Companies providing business support services relating to human capital management. Includes employment agencies, employee training, payroll & benefit support services, retirement support services and temporary agencies."
			20201050 Environmental & Facilities Services "Companies providing environmental and facilities maintenance services. Includes waste management, facilities management and pollution control services. Excluding large-scale water treatment systems classified in the Water Utilities Sub-Industry.
			20201060 Office Services & Supplies "Providers of office services and manufacturers of office supplies and equipment not classified elsewhere."
	2030 Transportation	203010 Air Freight & Logistics	20301010 Air Freight & Logistics "Companies providing air freight transportation, courier and logistics services, including package and mail delivery and customs agents. Excludes those companies classified in the Airlines, Marine or Trucking sub-industries."
		203020 Airlines	20302010 Airlines "Companies providing primarily passenger air transportation."
		203030 Marine	20303010 Marine "Companies providing goods or passenger maritime transportation. Excludes cruise ships classified in the Hotels sub-industry."
		203040 Road & Rail	20304010 Railroads

			"Companies providing primarily goods and passenger rail transportation."
			20304020 Trucking "Companies providing primarily goods and passenger land transportation. Includes vehicle rental and taxi companies."
		203050 Transportation Infrastructure	20305010 Airport Services "Operators of airports and companies providing related services."
			20305020 Highways & Railtracks "Owners and operators of roads, tunnels and railtracks."
			20305030 Marine Ports & Services "Owners and operators of marine ports and related services."
25 Consumer Discretionary	2510 Automobiles & Components	251010 Auto Components	25101010 Auto Parts & Equipment "Manufacturers of parts and accessories for automobiles and motorcycles. Excludes companies classified in the Tires & Rubber sub-industry."
			25101020 Tires & Rubber "Manufacturers of tires and rubber."
		251020 Automobiles	25102010 Automobile Manufacturers "Companies that produce mainly passenger automobiles and light trucks. Excludes companies producing mainly motorcycles and three-wheelers classified in the Motorcycle Manufacturers sub-industry and heavy duty trucks classified in the Construction & Farm Machinery sub-industry."
			25102020 Motorcycle Manufacturers "Companies that produce motorcycles, scooters or three-wheelers. Excludes bicycles classified in Leisure Products & Toys."
	2520 Consumer Durables & Apparel	252010 Household Durables	25201010 Consumer Electronics "Manufacturers of consumer electronics products including TVs, VCRs, hi-fi equipment, game consoles and related products. Excludes personal home computer manufacturers classified in the Computer Hardware sub-industry, and electric household appliances classified in the Household Appliances sub-industry."
			25201020 Home Furnishings "Manufacturers of soft home furnishings or furniture, including

			upholstery, carpets and wall-coverings."
			25201030 Homebuilding "Residential construction companies. Includes manufacturers of prefabricated houses and semi-fixed manufactured homes."
			25201040 Household Appliances "Manufacturers of electric household appliances and related products. Includes manufacturers of power and hand tools, including garden improvement tools. Excludes TVs and other audio and video products classified in the Consumer Electronics sub-industry and personal computers classified in the Computer Hardware sub-industry."
			25201050 Housewares & Specialties "Manufacturers of durable household products, including cutlery, cookware, glassware, crystal, silverware, utensils, kitchenware and consumer specialties not classified elsewhere."
		252020 Leisure Equipment & Products	25202010 Leisure Products "Manufacturers of leisure products and equipment, including sports equipment, bicycles and toys."

		303020 Personal Products	30302010 Personal Products "Manufacturers of personal and beauty care products, including cosmetics and perfumes."
35 Health Care	3510 Health Care Equipment & Services	351010 Health Care Equipment & Supplies	35101010 Health Care Equipment "Manufacturers of health care equipment and devices. Includes medical electronic precision instruments."
			35101020 Health Care Supplies "Manufacturers of health care supplies and medical products not classified elsewhere. Includes eye care products."
		351020 Health Care Providers & Services	35102010 Health Care Distributors Distributors and wholesalers of health care products not classified elsewhere.
			35102015 Health Care Services Providers of health care services not classified elsewhere. Includes dialysis centers and lab testing services.
			35102020 Health Care Facilities "Owners and operators of health care facilities, including hospitals, nursing homes, rehabilitation and retirement centers, animal hospitals, cemeteries and funeral homes."
			35102030 Managed Health Care "Owners and operators of Health Maintenance Organizations (HMOs) and other managed plans."
	3520 Pharmaceuticals & Biotechnology	352010 Biotechnology	35201010 Biotechnology "Companies primarily involved in the development, manufacturing or marketing of products based on

			advanced biotechnology research."
		352020 Pharmaceuticals	35202010 Pharmaceuticals "Companies engaged in the research, development or production of pharmaceuticals. Includes veterinary drugs."
40 Financials	4010 Banks	401010 Commercial Banks	40101010 Diversefied Banks Commercial banks whose businesses are derived primarily from commercial lending operations and have significant business activity in retail banking and small and medium corporate lending. Excludes banks classified in the Regional Banks and Thrifts & Mortgage Finance sub-industries. Also excludes investment banks classified in the Investment Banking & Brokerage sub-industry.
			40101015 Regional Banks Commercial banks whose businesses are derived primarily from commercial lending operations and have significant business activity in retail banking and small and medium corporate lending. Regional banks tend to operate in limited geographic regions. Excludes companies classified in the Diversified Banks and Thrifts & Mortgage Banks sub-industries. Also excludes investment banks classified in the Investment Banking & Brokerage sub-industry.
		401020 Thrifts & Mortgage Finance	40102010 Thrifts & Mortgage Finance Financial institutions providing mortgage and mortgage related services. These include financial institutions whose assets are primarily mortgage related, savings & loans, mortgage GSE's (government sponsored enterprises), mortgage lending institutions, building societies and companies providing insurance to mortgage banks.
	4020 Diversified Financials	402010 Diversified Financials Services	40201020 Other Diversified Financial Services Providers of a diverse range of financial services and/or with some interest in a wide range of financial services including banking, insurance and capital markets, but with no dominant business line.
			40201030 Multi-Sector Holdings

			A company with significantly diversified holdings across three or more sectors, none of which contributes a majority of profit and/or sales. Stakes held are predominantly of a non-controlling nature. Includes diversified financial companies where stakes held are of a controlling nature. Excludes other diversified companies classified in the Industrials Conglomerates sub-industry.
			40201040 Specialized Finance Providers of specialized financial services. Includes credit agencies, stock exchanges and specialty boutiques. Companies in this sub-industry derive a majority of revenue from one, specialized line of business.
		402020 Consumer Finance	40202010 Consumer Finance Providers of consumer finance services, including personal credit, credit cards, lease financing, travel-related money services and pawn shops. Excludes mortgage lenders classified in the Thrifts & Mortgage Banks sub-industry.
		402030 Capital Markets	40203010 Asset Management & Custody Banks Financial institutions primarily engaged in investment management and/or related custody and securities fee-based services. Includes companies operating mutual funds, closed-end funds and unit investment trusts. Excludes banks and other financial institutions primarily involved in commercial lending, investment banking, brokerage and other specialized financial activities.
			40203020 Investment Banking & Brokerage Financial institutions primarily engaged in investment banking & brokerage services, including equity and debt underwriting, mergers and acquisitions, securities lending and advisory services. Excludes banks and other financial institutions primarily involved in commercial lending, asset management and specialized financial activities.
			40203030 Diversified Capital Markets Financial institutions primarily engaged in diversified capital markets activities, including a significant presence in at

			least two of the following area: large/major corporate lending, investment banking, brokerage and asset management. Excludes less diversified companies classified in the Asset Management & Custody Banks or Investment Banking & Brokerage sub-industries. Also excludes companies classified in the Banks or Insurance industry groups or the Consumer Finance sub-industry.
	4030 Insurance	403010 Insurance	40301010 Insurance Brokers "Insurance and reinsurance brokerage firms."
			40301020 Life & Health Insurance "Companies providing primarily life, disability, indemnity or supplemental health insurance. Excludes managed care companies classified in the Managed Health Care sub-industry."
			40301030 Multi-line Insurance "Insurance companies with diversified interests in life, health, property and casualty insurance."
			40301040 Property & Casualty Insurance "Companies providing primarily property and casualty insurance."
			40301050 Reinsurance "Companies providing primarily reinsurance."
	4040 Real Estate	404010 Real Estate	40401010 Real Estate Investment Trusts Real estate investment trusts (REITs). Includes Property Trusts.
			40401020 Real Estate Management & Development "Companies engaged in real estate ownership, development or management."
45 Information Technology	4510 Software & Services	451010 Internet Software & Services	45101010 Internet Software & Services "Companies developing and marketing Internet software and/or providing Internet services, including online databases and interactive services, web address registration services, database construction and Internet design services. Excludes companies classified in the Internet Retail sub-industry."
		451020 IT Services	45102010 IT Consulting & Other Services

			Providers of information technology and systems integration services not classified in the Data Processing & Outsourced Services or Internet Software & Services sub-industries. Includes information technology consulting and information management services.
			45102020 Data Processing & Outsourced Services Providers of commercial electronic data processing and/or business process outsourcing services. Includes companies that provide services for back-office automation.
		451030 Software	45103010 Application Software Companies engaged in developing and producing software designed for specialized applications for the business or consumer market. Includes enterprise and technical software. Excludes companies classified in the Home Entertainment Software Sub-Industry. Also excludes companies producing systems or database management software classified in the Systems Software sub-industry.
			45103020 Systems Software "Companies engaged in developing and producing systems and database management software."
			45103030 Home Entertainment Software Manufacturers of home entertainment software and educational software used primarily in the home.
	4520 Technology Hardware & Equipment	452010 Communications Equipment	45201020 Communications Equipment Manufacturers of communication equipment and products, including LANs, WANs, routers, telephones, switchboards and exchanges.
		452020 Computers & Peripherals	45202010 Computer Hardware "Manufacturers of personal computers, servers, mainframes and workstations. Includes manufacturers of Automatic Teller Machines (ATMs). Excludes manufacturers of copiers, faxes and related products classified in the Office Electronics sub-industry."
			45202020 Computer Storage & Peripherals "Manufacturers of electronic computer components and peripherals. Includes data storage components,

			motherboards, audio and video cards, monitors, keyboards, printers and other peripherals. Excludes semiconductors classified in the Semiconductors sub-indus"
		452030 Electronic Equipment & Instruments	45203010 Electronic Equipment Manufacturers Producers of electronic equipment, instruments or components. Includes analytical, electronic test and measurement instruments, electronic components, connection devices and equipment not classified elsewhere. Excludes OEM suppliers classified in the Electronic Manufacturing Services sub-industry.
			45203020 Electronic Manufacturing Services Producers of electronic equipment mainly for the OEM (Original Equipment Manufacturers) markets.
			45203030 Technology Distributors Distributors of technology hardware and equipment. Includes distributors of communications equipment, computers & peripherals, semiconductors, and electronic equipment and components.
		452040 Office Electronics	45204010 Office Electronics "Manufacturers of office electronic equipment, including copiers and faxes."
	4530 Semiconductors & Semiconductor Equipment	453010 Semiconductors & Semiconductor Equipment	45301010 Semiconductor Equipment Manufacturers of semiconductor equipment.
			45301020 Semiconductors Manufacturers of semiconductors and related products.
50 Telecommunication Services	5010 Telecommunication Services	501010 Diversified Telecommunication Services	50101010 Alternative Carriers "Providers of communications and high-density data transmission services primarily through a high bandwidth/fiber-optic cable network"
			50101020 Integrated Telecommunication Services "Operators of primarily fixed-line telecommunication networks and companies providing both wireless and fixed-line telecommunication services not classified elsewhere."
		501020 Wireless Telecommunication	50102010 Wireless Telecommunication Services

		Services	"Providers of primarily cellular or wireless telecommunication services, including paging services."
55 Utilities	5510 Utilities	551010 Electric Utilities	55101010 Electric Utilities "Companies that produce or distribute electricity. Includes both nuclear and non-nuclear facilities."
		551020 Gas Utilities	55102010 Gas Utilities Companies whose main charter is to distribute and transmit natural and manufactured gas. Excludes companies primarily involved in gas exploration or production classified in the Oil & Gas Exploration & Production sub-industry. Also excludes diversified midstream natural gas companies classified in the Oil & Gas Refining, Marketing & Transportation sub-industry.
		551030 Multi-Utilities	55103010 Multi-Utilities "Utility companies with significantly diversifies activities in addition to core Electric Utility, Gas Utility and/or Water Utility operations."
		551040 Water Utilities	55104010 Water Utilities "Companies that purchase and redistribute water to the end-consumer. Includes large-scale water treatment systems."
		551050 Independent Power Producers & Energy Traders	55105010 Independent Power Producers & Energy Traders "Companies that operate as Independent Power Producers (IPPs), Gas & Power Marketing & Trading Specialists and/or Integrated Energy Merchants. Excludes electric transmission companies and utility distribution companies classified in the Electric Utilities Sub-Industry."

O-List and Attract40 Index

There are two large equity lists on Stockholm Stock Exchange: the A-List and the O-List. Within each list are a segment for the most-traded equities, "Most-traded", on the A-List and "Attract40" on the O-List.

The O-List Index consists of all shares listed on the O-List. The Attract40 Index consists of the most traded shares on the O-List.

The composition of Attract40 is defined by the following criteria:

(i) Comprises of the 40 shares (the most-traded equity series') on the O-List which have the highest turnover rate over the most recent six-month period, adjusted according to the free float.
(ii) Companies that do not meet the minimum requirements regarding turnover rate can also be traded on the Attract40. If trading in such a company's equities is so extensive that, had it been listed on the A-List it would have been eligible for listing as a "Most-traded" company, it will be listed on the Attract40.
(iii) All stock market information must be provided by the company in English.
(iv) In certain cases, newly listed companies may be listed on the Attract40. In order for Stockholmsbörsen to approve such listings, it must be considered highly probable that the above-mentioned quantitative requirements will be met, especially those requirements set out in item 2 above.
(v) The company must have a free float of at least SEK 500 million in order to sufficiently attract large international investors.
(vi) Companies with observation status are not eligible for trading on the Attract40. In the event of a public offering in such companies, a company's participation on the Attract40 may be hindered.

Small Cap Index and Primary Capital Certificates Index

The Small Cap Index consists of the 10% lowest capitalised shares at Oslo Børs, semi-annually reviewed.
The number of shares of a company applied in the index, $q_{i,t}$ in the formula in 4.1, is the current outstanding number of shares. If corporate actions cause adjustments to the index, the number of shares is changed to fully reflect the new market capitalisation of the company in the index.
The review is conducted on the basis of figures as of (at) 30 November and 31 May. Implementation of the reviewed index will be effective from 01 January and 01 July, respectively. Re-balancing will be undertaken using closing prices the day prior to implementation.

The "Primary Capital Certificates Index" consists of all PCC's listed on Oslo Børs. The Primary Capital Certificates Index was launched with a base date 30.12.1994. The Index is a Total Return Index and started with a base value of 500. The Primary Capital Certificates Index will not be a part of the new index family described in this document.
