

Setting up a WRDS account

When writing the BSc thesis, you will likely work with data on firm financials. Many interesting datasets (such as Compustat and CRSP) are available via WRDS. To use WRDS, you have to create a WRDS account. Use the following link to access the WRDS Registration form at https://wrds-www.wharton.upenn.edu/register/hhs/?user_type=class-student

1. Follow the directions on the Registration form to enter your identifying information.
2. For the Subscriber, select your school's name from the drop-down list.
3. Your User type, **Class - Students with Code**, has been selected by default.
4. Enter **5414d36b** as the Class Code.
5. Click the Register for WRDS button.

WRDS accounts require two-factor authentication. We recommend you use a smartphone for the verification process. First, install the Duo Mobile app on your phone. This free app can be downloaded through your device's app store. Follow the directions at [How to Log into WRDS](#) to register your smartphone and use Duo two-factor authentication to set up your WRDS account.

Already Have a WRDS Account?

After you have logged into WRDS, use the following steps to enroll in our class account. You will need the Class Code above to enroll.

1. In the top right corner of the screen, select **Your Account > Your Account Info**.
2. Scroll down until you see the Your Classes table and click the **Enroll in a Class** button.
3. Enter the Class Code and click **Submit**.

IMPORTANT: If you have any difficulty setting up your account please contact WRDS Support at: <https://wrds-www.wharton.upenn.edu/contact-support/>. When opening your support ticket you must use the email associated with your existing WRDS account, or the email you intend to use to set up your new WRDS account.
